This Company offers unritalled facilities for the insurance of Buildings and Personal Property against fire. The advantages offered are security beyond the reach of circumstance, as the real estale insurance is by law bound for the assessment made to cover losses beyond the power of casion. Every person haured is a member of the Company, and entitled to one vote. The cost of insurance does not exceed one-third as much as in Stock Companies, saying nothing of the increased security and the incomparable case with which losses are settled. During the lattifuction the transfer of the increases the control of the property insured, not exceeding two miles on the dollar. Its business is princtically confined to this Scare.

JOHN MCMANMAN. IMPORTANT TO THE PUBLIC! THE following advertisement was published in May, I 1948, in the "Boston Daily Times," and various other newspapers in the United States, by James G. Wilson, Esq., the owner of the "Woodworth Paieut," shortly after I had advertised my "PATENT STATIONARY CUTTER, PLANING, TONGUEING, AND GROOVING MACHINES THROUGHOUT the Villey Bushesses, and the Villey Bush

throughout the United States:

"PLANING MIACHINES.

"Itake this method of answering the frequent inquiries, by letter and otherwise, as to my opinion upon the various notices through the papers, of the bationary Knife Fanding Machines attempted to be palmed off upon several persons ignorant of their true worth. I would state for thin information of the requirers that they will find substantially the machine now offered by several pretending inventors, described in the 16th volume of the Repertory of Arts, invented by Samuel Benthan, in the jear 1731. A like machine was patented in this country by one Kugler, some six teen years since, and another one put up by Albert Richards, of West Troy, N. Y., and abandoned about the same time. It ought to satisfy the public to know that after fifly eight years experimenting upon these machines, not one in use is of any value for the purposes contemplated.

I will furnish a Stationary Knife Machine equal to any now in use, arto any offered by the pretending inventors, at the cost of the machine and five per cent for my troutle.

May 19, 1849.

I deny that any person ever saw or heard of such a machine as minor until I invented the same. Said machine was operated in the month of August, 1843, and no machine before this could do so much work, and do it as well as mine. In reply to the above salverttement, and in order that the public may be assured that linear what Isay, I will offer to pledge ONE THOUGAND DOLLANS against an equal amount from said Wilson, that ONE of my machines will plane, or plane, tongwe and groove with less power, as much lumber in the same time, and do it as well to first the made at my Steam Mill, Horder St., Lant Hoston, Mass, or at such other place as my be conceaned. "PLANING MACHINES.

JOHN DWIGHT & CO'S SODA SALÆRATUS MAY be found at the Sugar Warchouse of Goodrich & iunter, No. 42 East water-st.

The attention of the public is called to this article as being superior to Pearlsh Salaeratus in its effect—riving cookery a more delicate appearance and flator; and also as more wholesome—Soda being more congenial to the human vatem than Potash. It is more economical than Pearlash between the less quantity being reminded to meahure the

alteratus—a less quantity being required to produce the ante effect. The article is put up in pound papers with all directions for use.

Also may be found, John Dwight & Co.'s Washing & Cleansing Powders, which will be found, on trial, a very superior article, savin much labor of weshing Clother, So. It will soften haver. To Engineers and Machinists it is invaluable for emoving grease from Machinery and other from works leaving the tron perfectly dry, and not likely to rus. Directions for use are printed on each package.

OFFICE OF THE DAMA SENTINFL, ? MILWAUKEE, February 24, 1862. Our market for the past week has been very milm and the receipts largely increased. Business of all kinds has felt the improvement, and the amount of produce in store at this port accumulates rapidly. Should the line weaer continue and the roads remain good, the prices not offering here must induce Farmers to push their surplus into market. The general impression is that prices will not recede much, if at all, from their present mark. The receipts of wheat, during the last week, were newly 25,000 bushels; of Barley 2000; of Oats 4500, and of Pork

Some check, they would, undoubtedly, impose on the drinking of spirituous liquors, araking those who are addicted to that habit resort occasionally to the allowed stimulants or marcotics, in its stead. But it would still exist and flourish, in spite of penalties. When the appetite is so imperious as in the case of men accustomed to spirituous pointions, it will be gratified. We shall have, if this bill passes, an enormous amount of smuggling, of illicit distillation, such as has braved the law, for a century or more, in Iraland, and of drunkenness in obscure corners.

To the temptation of appetite will be added the temptation of gain, and both together will defy the vigilance of the legal authorities. We hear that something of this effect has been observed in Massachusetts, where the policy of the law is to discourage the sale of spirituous liquors, though as yet no such prohibitions have been adopted in that state as are proposed by the bill copied from the Maine Liquor Law, and just introduced into the New York Senate. arory threat from the Fond du Lac Journal:

The Madison Argus of the 17th harps upon the old story of fraud in the location of the State Prison at Waupun. This means nothing less than that an effort is to be made to remove the prison to Madison. We apprehend that Madison will not be the gainer by discussing the policy of removals, as the people have been well nigh goaded into a firm resolve to remove the State House to some point where corruption and extortion is less prevalent. If removal is to be the order of the day, the north will have a hand in the game. Both houses of the Legislature, in accordance with a joint resolution passed on Wednesday last, adjourned at moon to-day until next Thursday, at 16 o'clock A. M. We understand that most of the members together with the officers of the two houses, have accepted the invitation from Milwankee to attend the Birth-night Ball to be given on Monday evening next. Although we are probably the greatest losers by this recess, having a large office force under Juy at an expense of at least twenty-five dollars per day, to do the printing incident to the cession, the pay of which goes on whether the Legislature is in session or not, yet we are not disposed to grumble, believing, as we do, that the public interest will not suffer by this brief recess. The members will have an opportunity of testing the hospitalities of the Comter-tial Emporium—many of them will see a portion of the country that they otherwise would not, and a few day's spent in social intercourse will make them better acquainted with each other, and leave them in a mood to work with hearty THE HUSBAND OF THE LATE JENNY LAND .- The New York Tribune speaks thus of Отто Gold-SCHMIDT, the happy partner of the unequalled Jenny:—

THE "NEW DEALS"

In your paper of Monday morning I notice an article, taken from the "Wisconsin Argus,"

charging Judge MILLER with having entered the

arena of politics, and that he drew the resolutions

that were offered at a late meeting of the Demo-

erats in this city, in favor of a "new deal" in the

election of delegates to the National Convention,

and also, that he procured a lawyer from Pennsyl-

sania to offer them. As I offered resolutions at

that meeting, in favor of a Convention to select

delegates to the Democratic National Convantion

I presume I am the Lawyer alluded to. I feel it due to my-elf and Judge Miller, to say, that he

never saw those resolutions, until after they were

duction, and a very respectable meeting is respon-

sible for their adoption. In all my intercourse

with Judge MILLER he has studiously avoided

taking part in politics-but he does not consider

neither would any honest man expect, that his

position should deprive him of the right to speak

It was self evident that there was much discon

tent in our party on account of the singular and

unexpected selection of the delegates to the Na

tional Convention, by the late State Convention

It is equally apparent, that if a unmination of

candidates were made by the votes of these dele-

gates, a division in the party would be almost in-

evitable. For these reasons I offered the re-olu-

tions, with a hope of healing the breach before the

nomination was made. The resolutions were not

offered to favor the nomination of any particular

candidate, but for the good of the party. If the

District Conventions should nominate new de-

legates, instead of the nominecs of the late State

Convention, then the people have spoken and all

bould, and no doubt would be satisfied, and en-

ter the campaign with unanimity and certainty

of success. By a similar movement as that made

in our late State Convention, I have seen the

Christmann, watchman in the 5th Ward, Cady tried, early on Sunday morning, to pass begus five frame pieces, at several places on Walker's Point. He went into the grecery of Paul Keller, broke a bottle, and offering to pay the damage, tendered the counter eit money, demanding the change back. Watchman Christmann having had spicion against him for a length of time, arested him, and also William Calboun, his partner n this trade. Carly managed to escape from the officer, giving the latter a heavy blow in the face. Christmann pursued him closely, and fired at him several times, but missed his aim. Sheriff White, however, arrested Cady again on Sunday after-

In another part of this sheet we publish a bill reported on Satunday to the New York Senate, prohibiting the sale of alcoholic or fermented liquors within this State, and enforcing the prohibition by penalties of fine and imprisonment. Last evening, a numerous meeting, held at Metropolitan Hall, in this city, adopted resolutions in have of making this bill the law of the land, and listened to impressive addresses from the lips of cloquent and benevolent men, urging the importance and necessity of the law.

As we disagree wholly with those who framed the law, and those who supported it last evening at Metropolitan Hall, we take this occasion to say, that, belonging to the class of the constitutionally temperate, we have no community of feding or appetite with those who oppose the law because it mie-feres with the indulgences which they are in the habit of allowing themselves.

For aught that we should cate, personally, the wine-press might never be trodden more idistilleties and breweries, wherever they stood, might be razed to the ground; the pipes of port in the vaults of the London docks might be emptied into the sea, and after them might be pitched all the tobacco of the southern states and the West Indies, all the coffee preduced within the tropics, all the ten of China, including the tea plantations formed by Mr. James Smith, in North Carolina, and all the opium of the East and West. Let us take this occasion to say, however, that of all these applications to the nervous system, the use of femmented lipuors, as it is the most ancient and the most general, so it is in our view of the matter, the least in jurious to the greater number of constitutions.

We suppose, therefore, may we are confident, that if the object of those well-meaning persons who are engaged in the attempt to prevent excess by weapons of the law, could be attained, and the sale of infoxicating liquors prevented, by prosecutions and penalties, it would simply give another direction to intemperance without enalicating it. Men who could not noon, at a house of ill-fame on Walker's Point, the keeping of which he was connected with. Moritz Morgenschein, watchman in the Fits Ward, made a complaint against three individu als, accused of having made an assault upon a man by the name of Mohr, with intent to kill him. It appears that Mohr was peaceably walking home, coming from a social dance in a Saloon n Spring-street Hill, when he was attacked on Spring street. interesting Trial. THE LOST CHILD.

Correspondence of the Fond du Lac Journal. Oshkosh, Feb. 18, 1852. FRIEND BERSON:—The Trial of the Lost Child is the all-absorbing question here now. It has lasted a week to-day, and I know not how long it will continue. People flock in from all parts of the country to heat the trial.

On the part of the complainant (the Partidges,) the testimony is strong, positive, certain—circumstantial and corroborative all. It is an avalanche; and but for the tawny appearance of the child, would be more than conclusive.

On the part of the defence, Mesers, Geo. Cowan, W. Powell, John Williams, Archibald Caldwell, L. B., Porlieu, Augustus Grignon, Robert Grignon, Mr. Webster, and others, Indian traders, eatify to the opposite, that it is the Indian's child. And this is corrobotated by Messis, Johnson, Dodge, Smalley, Sawyer, Stanley, and all others who have ever had any connection with the Indians. The Indians themselves, in their testimony, contradict the half breeds and the Indian traders, and contradict themselves.

There is quite a feeling prevailing, that money and all seris of corruption is used on the part of the defence; and that those who get a livelihood by stealing from the Indians from tyreness.

The Sheriff, in whose care the child was, let him come into court daily, fifthy, and his head uncombed. And the white friends of the child said he had attempted to paint it. Much feeling was raised by this tale; and at the request of Mrs. Partridge, the child has been taken under other hands.

The American Mails, quite anxiously looked for, arrived vesteday. But the dates from New York are only to the 23d ultimo, at which time you had searcely digested the French nows. The Tribane etters its indignation with increasing elequence. Its article has been read here with deep interest. It embodies the sentiments and sympathics of an ardent lover of freedom.

But I grieve to say that the enemics of freedom are not alone to blame for its recent collapse in 1848, to overthrow despotum. Some of its thrones toppled down and nearly all of them trembled. But those who struck for freedom lacked either the wildom or the virtue to profit by the advantages they acroed for their cause.—The constitutions and privileges then granted to the people by their sovereigns have been either annualled or retracted. In Fratee, where the strongest impulses for freedom exist, and where Republicanism was most popular, there has been mather harmony of opinion, or concert of action. The people, to a large extent, were sound, but their representatives were unfinitful, and their councils distracted. Things went on in this way untill a pretty general opinion prevailed that Republicanism would not do for France. This resalted from no change of sentiment in regard to it at form of government, but from the unisconduct of its Champions and Representatives.

Had Mr. Greely's letter appeared a fortnight cartier it would have been transferred to the London Times, for it is better Thunder than its own. But the tone of the English Press is subdued. John Bull's relecting upon the French question. Its bearings may well induce England to pause.

I hear to-day from a reliable source that imasemuch as the Captain of the British tessel at Nicaragua acted without orders in fining upon the Promethees, the Government has disavowed the act. But if this he so, you will have heard of it before this letter reaches bome. Thope it is, for we do not want any more "passages at a arms."

And I fear that the ments of the question are not all on our side.

all on our side.

Chalons, Jan. 9.

Instead of fini-hing this Letter in Paris, I was interrupted by calls, and at an early hour this meaning we left the Metropolis, and have been all day passing through a County which, with American Institutions and American Intelligence and industry, would produce in abundance all that the eye or appetite could desire. For more than two hundred miles the Volleys of the Seine and the Sanne, through which we passed, are as fertile and as beautiful, and much broader, than those of the Sa-quehamah, or the Genesee. With the application of marl and plaster, which every where abounds, all the products of the Earth are produced in profusion. Upon the Hills, on either lide of the River, Vinevards are seen, and though at this scason neither the Valleys nor the Hills are clothed in Verdure, or "drop their fatness," we the view of so many evidences of fertility is refreshing. Oh what a glorious Country France would be if her 350,000 Soldiers were, instead of constaining the products of a partially cultivated soil, restored to the workshops and the farms!

We passed Fontainbleau, but as its magnificent forest is now disroled, concluded to defer our visit to the favorite residence of Josephine.

The Rivers I have named, instead of being made available, as our Rivers are, for navigation and other purposes, are almost entirely unused. We did not see, on those Rivers and the Yonne Canal which runs parallel with them, all day, as much Produce and Merchandize, or as many Boats, as we should have met on the Eric Canal in a single hour. And yet we were passing through Citicand Villages during the whole day, not more than ten or tifteen miles distant from each other, and containing from five to twenty-five thousand inhabitants.

The Pensautry of France are poorly clad and standard and the farmed with them of the content o Chalons, Jan. 9.

The Pensantry of France are poorly clad and miserably housed. Where fuel is so scarce and dark fite is a havry in which the poor are unable to indulge. But inured as they are to this privation, where no American would perish they seem confortable. It is, nevertheless, a great wrong to all France that the Goyermoent should repress the working of her Mines, which might produce an abundance of Coal of an excellent quality. In this, as in other respects, the principle that Governments are instituted for the benefit of the governed, is widely departed from.

Duos, the Ancient Capital of Burgundy, where we had an opportunity of looking round, is a

rieissitudia of good and evil fortune through which all Ancient Cities have passed. Dirkins has node Dijon the scene of a tragedy of absorbing interest. It was here that EDITH DOMEN awaited Carette it was here that noble, spirited Woman avenged her wrongs without compromising her honor; and it was here that notice which had a name, and for which human jurispradence has invented no punishment, were expiated fearfully but righteously by an avenging Lecomotive, whose iron wheel crushed the the wretch to powder.

Chalons is the Tenninus of the Paris and Lyons Rail-Way. And here we expected to take Steamers, but that expectation was disappointed in a manner quite unfore-cen. The Snone is fozen, or infer has been for ten days, but is now breaking up. After beating about we found the Captain of a Steamer who promises to take us to Lyons to-monow. Instead of taking the Diligence and a night ride, we concluded to wait for the Boat, as discomfortable and unsightly looking a structure as I have ever seen. She is an Iron Steamer over 200 feet long, only nine feet wide, and without any upper works. Indeed, but for the narrowness of beam and her great length, she looks like a Hudson River Steamer razed for a Ceal Boat. It has thee low, narrow, disagreeable looking Cabins, into which as many classes of passengers are admitted, with a prospect of facility and like the light like the first class, as you do

chases of passengers are admitted, with a prospect of faring nearly as well, in the first class, as you do in the Cabin of an Eric Canal Freight Boat. But if the weather should be good, the discomforts of the Steamer will be forgotten in the nevelty and beauty Steamer will be reversed by the River scenery.

Lyons, Jan. 11.

Rhine. We have not yet seen that of the Rhone, but the approach to Lyons, on the Saone, for 15 rolls fill, and delights the eye. The River is rapid and becomes tormous so that the views are consently changing, each surpassing the other in beauty and grandeur—grandeur, because in approaching Lyons you exchange the comparitively level country for bold mountain views, cultivated as V. counds to their peaks, and rendered striking with their Chateaux and Castles.

nearly 200 miles from the Mediterraneau Sea. In clear weather the Alpa and Mont Blane may be seen distinctly from the eminence where the Cresurs once had a Palace, of which there is still a run, and where at least one of the Roman Emperors was born. The history of modern Lyons that of painstaking and thrift, but anciently it was the scene of stirring and startling events. Here the early Christians suffered martyrdom by thousands. And here, in the Revolution of 1793, blood ran, literally, through the streets. But all is peaceful, and quiet now.

Duos, the Ancient Capital of Burgundy, where we had an opportunity of looking round is a large, beautiful and apparently prosperous City, its Churches. Town House, d., are splendid structures. It is a place, as you know, of great historical interest, being the residence of the Dukes of Burgundy and the seens of the various viewindts of good and evil fortune through which all Ancient Cities have passed. Digitals

We have had a day's experience in a French Steam Boot, which, however inferior in every tepect to our own, we are quite unwilling to exchange, as we are compelled to do here, for a French Diligence.

The day was cold but the temptations of scenary kept us much on deck. The Saone passed yest aday though a delightful country. The soil, hough it has been cultivated a thousand years or more, is of primeval richness. Ancient Chateaux of mojestic proportions, are numerous and imposing. Every village boasts of a church which, in their magnitude and magnificence surpass those that adorn our principal cities. If Churches were portable it would be a great thing to our thriving Cities to import some that are quite uscless here so it will be uges before we shall have leisure and labor to build such. Absurf as this suggestion is the removal of the Obelisk of Luxor from Egypt to Taris was an enterprise even more formidable than the removal of a church to America, for the latter might be taken in detail.

than the removal of a church to America, for the fatter might be taken in detail.

The "Zephyr," that being the name of our Steamer, resembling in many respects the descriptions of the Sea Sergent, made but one landing from Chalons to Lyons. This was at Macon (where the wine bearing its name is made) a large Town that furnished mare Passengers, six of whom were solders. The French travel, at home, but lit is. France, with her 40,000,000 of inhabitants, does not furnish as many passengers for the Railways, Steamboats, Dilligences, e.e., as the Stateof New York with her three millions.

The Rivers Saone and Rhone are said to present scenery as impressive and Lautifal as that of the Rhine. We have not yet seen that of the Rhone, but the approach to Lyons, on the Saone, for 15

as V. Astance to their peaks, and tradected straing with their Chateaux and Castlee.

The indications of wealth as you approach Leon, are all realized upon entering the City, whose massive docks, well built streets and fine manuscens, show what the manufacture of Silks has done for its inhabitants. There are some seven hundred Silk Manufactories, with over 20,40% looms here. Lyons contains 250,000 inhabitants, for whom, in good seasons, there is ample employment. Having best founded by some Romans forty years before the Christian Employment and the control of highly respectable Autiquity, as its central streets, laid out and built up ten or lifteen centuries before America was discovered, strongly testify. Lyons is far inland, it being learly 200 miles from the Mediterraneau Sea. In char weather the Alpa and Mont Blane may be

West The great and increasing popularity of this remedy is mainly attributable to its controlling power over
actue inflammation and nervous irritation. From the best
of evidence in our possession, from Physicians, of the best
standing, who have prescribed if, and from others who
have been healed by it, we are satisfied that it will cure in
some cases where no other known remed yn ill do it. This
it has appeared to do in numerous cases of Chronic Sore

We would respectfully call the attention of our many friends, and the public generally, to an in-strument we have recently imported from Paris, called a from which the above cut was taken. By it we can take the cancer shape, and unorringly fit the most irregular heads. Many can testify to the inconvenience, and annoyance, and actual pain they are subjected to, in breaking in Hats that will not fit them. By this ingenious contrivance, this very great annoyance is done away; as the Hats are mule to fit perfectly the first time.

Another great advantage is, by keeping a copy of the impression, we can at all times fit our customers from all parts of the country.

We invite all who desire a perfect fit in a Hatto call and leave an impression of their head; and all those who take pleasure in witnessing the inventions of the ingenious, to call and see the operations of this curious instrument.

Having adopted the Cash Synem (which all will readily acknowledge to be the best,) we are enabled to sell the best Sifk Hatt made, at the extreme low piece of \$1.25; surpassing any \$5 Hat sold in this city. Our Hats are all manufactured by ourselves, and in offering then to our customers, we do so, with the confident assurance, they are all we recommend them to be. We invite all who do not wish to pay two profits upon a Hat, and are willing to save 25 per cent, to call and see us. "Conformateur."
